

QTL^{TRAN}S

SINGLE POWER SUPPLY CENTER (PSC)

Housing

18 Gauge welded steel measuring 17.0"L x 14.5"W x 4.0"D with 25 knockouts and a barrier plate. Bracket (UMB - Universal Mounting Bracket) included to secure housing to a 2X4 wall stud for recess wall mounting or to surface mount. Door measures 15.5"L X 18.0"W.

Multi-Volt & Taps

The QTL Series Power Supply Center comes standard with five (5) primary taps to provide secondary voltages of: 11V, 12V, 13V, 14V & 15V or 22V, 24V, 26V, 28V, & 30V. Loads may be connected to one (1) of the primary taps up to the full watt rating of the PSC. The advantage is that loads at varying distances from the PSC can be tapped to recover voltage drop and produce between 85%-100% light output. See separate "Voltage Drop Calculator".

Primary Circuit Protection

All units come with both a primary magnetic circuit breaker and a primary auto-reset thermal protector, which is built into the transformer. This thermal protector will temporarily disconnect the primary if the transformer over heats due to an overload or saturation from a faulty dimmer.

Secondary Circuit Protection

Protected by up to fifteen (15) magnetic circuit breakers. Breaker sized to the feed load per N.E.C. Article 411 (not to exceed 25 amps per load). All wiring by the electrical contractor must be Class 1 compliant to N.E.C. Secondary breakers available in 5A, 10A, 15A, 20A, and 25A.

Toroidal Choke

A choke or "debuzzing coil" reduces noise and in-rush current. A choke is standard, to achieve quiet operation.
